

AUTOMATIC WINE BOTTLE LABELLER UP TO 800 B/H, ESSENTIEL

Automatic labeller (labelling machine) from the renowned French manufacturer CDA for labelling wine bottles, applies up to two labels (front label and back label). The device also allows for crimping/shrinking aluminium or plastic (PVC) caps. The speed regulation system ensures fast and efficient labelling, allowing for labelling up to 800 bottles per hour.

This labeller impresses with its ease of use and quick adaptation (without additional equipment) to different bottle

sizes (from 1/2 l to Magnum).

The intuitive touch screen makes it easy to enter settings.

As standard, the device applies two labels (front label and back label) printed on one roll.

Technical characteristics Essentiel

APPROXIMATE MASS (KG)

120 kg (depending option)

DIMENSIONS (WITH FRAME)

2591 mm in width (depending option)
1882 mm in height (depending option)
778 mm in height (depending option)

POWER CONSUMPTION

1kW (depending option)

SUPPLY VOLTAGE

380 V 5 wires (3P + E + N)
Or
380 V 4 wires (3P+E) + plug 220 V
(Please specify when ordering)

PNEUMATIC SUPPLY

6 bars
Dry, non-lubricated air
(Pipe Ø Int/Ext = 8/10 mm required)

CONTROL

by touch screen

IDEAL OPERATING TEMPERATURE

from 10°C to 30°C
