

CLOSED FERMENTATION, STORAGE WINE TANK

The closed tank is used for fermentation and storage of wine and other alimentary liquids. High quality materials with big thickness ensure stability during a long professional usage of the tank. The high polished tank's inside do not allow deposition of wine scale and ease the cleaning of the tank. Thanks to the vertical construction of the cooling jacket, the cooling process will be efficient even if the tank is not totally full.

Basic equipment:

- manhole cover $\varnothing 200$ mm
- conical off-centered bottom
- relief valve DN50
- type plate with note card
- support for ladder
- level indicator $\varnothing 16$ with scale, open model
- thermometer analog
- sampling valve DN15
- manway door oval, LCL model
- shell for thermometer sonde with PG9 fitting
- cooling jacket - 0,5 m²/1.000 lit
- ball valve DIN DN32 on clean drain
- ball valve DIN DN32 on total drain
- material AISI304/BA (W.Nr.1.4301/IIIId)
- polished with rotated overlapping pads

Additional equipment (an extra charge):

- cap with chain DIN DN50
- manhole cover $\varnothing 300$ or bigger
- thermometer digital
- thermometer digital with control
- level indicator $\varnothing 16$ with scale, closed model
- manway door oval, LCB model
- manway door oval, round model
- manway door oval, square model
- ball and butterfly valves - garolla, WG, Macon, GAS
- adjustable legs
- closed legs
- slope fitting for mixer
- decanter
- centered bottom
- jacket for heating
- manway door on hinge
- cooling jacket bigger than 0,5 m²/1.000 lit
- fitting for shield gas
- caps for valves
- dismountable pipe for level indicator
- material AISI316L/BA (W.Nr.1.4404/IIIId)
- grinding surface of coat (schotch brite)
- mirror surface of coat.
