

HKN ROTARY MOWER

In the case of a sickle or rotary shredder, the mowing and shredding process is carried out by rapidly rotating horizontal blades. The special design ensures a clean cut even in tall grass, and the cut grass is finely chopped and evenly distributed. At the same time, shredding and distribution promote rapid decomposition of the cut grass, which means that it does not have to be removed but remains in the mowed area.

HKN rotary mower for tractors from 16 HP.

Application:

- vineyards and orchards
- berry crops
- nurseries

TECHNICAL DATA

		HKN 850	HKN 950	HKN 1000	HKN 1200	HKN 1500
WORKING WIDTH:	M	0,88	0,98	1,08	1,15	1,45
Overall width :	m	0,94	1,04	1,14	1,22	1,52
Depth / height:	m	1,32 / 0,22	1,25 / 0,22	1,32 / 0,22	1,40 / 0,22	1,70 / 0,22
Row width:	from m	1,30	1,40	1,50	1,70	2,00
Setting range / linear:	m	-	-	0,40	0,40	0,40
Power requirement* :	Power requirement*	12 / 16	12 / 16	14 / 19	14 / 19	18 / 25
Rpm of PTO:	rpm	540 / 1.000				
Weight**:	approx. kg	165	170	215	220	280

* The power requirement also depends upon the grass density and grass height *** Weight may differ according to equipment
