

JUICE FILTER - PIPE-SCREEN-COMBINATION

Gross price:
10 740 €

Net price:
8 732 €

Pipe screen combination with 2 parallel stainless steel slotted screens for coarse filtering. Valves are provided to shut-off the screens individually for cleaning purposes.

Angle type strainers are intended for use in pipelines, for coarse cleaning and filtration of liquid flows for the food, chemical and pharmaceutical industry as well as for low-germ processes. They are suitable for use in processing low-viscosity flowing media like water, steam, liquid foods and drinks with high hygienic requirements.

Main features of the angle type strainers: direction of flow is from the outside to the inside; slotted tube results in low flow resistance; up to 75% higher flow cross section; flexible slot widths from 50 µm to 4 mm possible; the slot width can be easily adjusted to specific requirements by replacing the slotted strainer tube; robust strainer element results in high pressure resistance; tool-free installation to DN100, with heavy-duty clamp DN125 - DN150 feature a DIN 11851 grooved nut. The strainer can be emptied and cleaned by removing the slotted tube. The scraper ring cleans the strainer automatically.
