

MANUAL BOTTLE RINSER WITH RECYCLING PUMP

Gross price:
9 941 €

Net price:
8 082 €

The manual rinser mod. SMP is designed to rinse empty bottles and jars before the filling operation. Thanks to its compact size and reduced weight, this unit is the essential equipment for the small producer of wines, oils, fruit juices and other food products. The operator puts the bottles upside-down on the nozzles, the water jets are starting by the pressure of the hand. The unit has to be simply connected to the water supply net, without need of electric or pneumatic connections. The unit is supplied including a filtering assembly for the water, including a micro-filtration cartridge.

The basic model &HASH39;SMP&HASH39; is designed with 4 water rinsing nozzles plus a recycling pump.
