

MULBERRY WOOD BARREL, BRASS TAP

Boros Hungarian barrels are made of carefully selected mulberry wood. Wood for the production of barrels is seasoned in the open air for three years. The seasoning process "flushes out" undesirable substances and significantly improves the wood's influence on the taste of the drink. The barrels have elegant hoops made of double-galvanized steel, which will ensure an attractive appearance for many years. The presented barrels are made of thick staves (27 mm). Each barrel is professionally burnt inside. Available toasting levels: low, medium, medium +, high. The barrel is securely packed, 1 plug, base and a solid brass tap ensure tightness, comfort and natural taste.
