

## PORTABLE DENSITY METER DMA 35

**Gross price:**  
**17 245 €**

Net price:  
14 020 €

The portable density meter DMA 35 from Anton Paar is a portable density measuring device.

- Automatic calculation of important parameters in wine and must
- All parameters displayed on a large digital display
- RFID interface
- Bluetooth interface for data transfer
- Suitable for monitoring the fermentation process
- Complete with 180 mm filling tube, rubber protection for measuring cell and display

In short:

- For quality control in the field, e.g. for wine and wine must (°Brix, °KMW, Oechsle, Baumé)
- For checking wort and apparent extract during beer production (°Plato)
- Fermentation graph for each tank directly on the device's screen
- One device replaces all glass hydrometers used so far
