

RADIUS SL PLUS

The weeder, hydraulic, tilting row cultivator is used for mechanical removal of weeds growing in the bushes, between the seedlings. A gently operating sensor tilting the cultivator protects the seedling and bush against damage.

Technical parameters:

Oil demand

Basic device: approx. 8 - 12 l/min per unit

Active harrow: approximately 35 l/min

Driven discs: approximately 20 l/min

Mower: approx. 20 l/min

Libra

Basic device: approx. 35 kg

Rotary cultivator: approximately 23 kg

Driven discs: approximately 42 kg

Blade/sensor length: approximately 500/620 mm

Working speed: approximately 3 to 10 km/h, depending on the tool used

Additional accessories:
