

SEMI-AUTOMATIC BOTTLE RINSER WITH CIRCULATION PUMP

Gross price:
27 518 €

Net price:
22 372 €

The rotary rinsing machine mod. TP10/R is designed to rinse new bottles, to clean the inside from powder and any small particles, prior to the filling operation, with a recycling system for using a sanitizing or an alcohol-based solution. In the wine industry, it can be used with a solution of water and SO₂. Output up to 700 bph
