

SIDE DISCHARGE BRONZE OVERFLOW & PRESSURE CONTROL VALVE 3/4"

Bruttopreis:
1 244 €

Nettopreis:
1 011 €

In open water systems a by-pass valve can be used to ensure sufficient water flow at all times for pump protection. For cooling installations with closed water systems - Quantor range - a by-pass valve is recommended, depending on the installation. It ensures sufficient flow through the chiller to avoid possible damages.
