

STAINLESS STEEL CANDLE FILTER HOUSING

Gross price:
11 067 €

Net price:
8 998 €

Candle filter housing 1x30" in stainless steel for microfiltration, before bottling, of wines, ciders, etc. Designed for the filtration of food liquids, in compliance with sanitary and hygienic standards. Housing easy to clean and disinfect.

Housing made of AISI 316 stainless steel, cartridges 1x 30" Code. 7 in the standard version. Large 0-10 Bar pressure gauge with double valves and double connections for inert gases and/or compressed air to fill or empty the housing. Sight glass on the top of the housing to check the correct filling of the housing to avoid empty spaces. Inlet and outlet with sanitary butterfly valves with multi-position system with EPDM seals.

The product intended for filtration passes (from outside to inside) through a filter cartridge mounted in a stainless steel housing.

Capacity up to 1000 l/h.
