

VINPILOT PRO TANK CONTROLLER

The VinPilot® Pro tank controller offers excellent fermentation control thanks to completely reliable temperature control. But it can do even more:

Cooling and heating

You can use the VinPilot® Pro controller for cooling, cooling and heating, and even perform operations with automatic switching between cooling and heating using a 3-way valve.

Monitoring the progress of fermentation

Oxygen dosing - micro macro oxygenation

Monitoring the wine level in the tank

Micropressure monitoring, pressure in the tank
