

WINE CORKER P45

Gross price:
30 148 €

Net price:
24 511 €

The corker is designed for natural and synthetic corks with a diameter of 22-26 mm (optionally also 28 mm) and a height of up to 50 mm. The corking operation involves clamping the cork inside special jaws made of Aisi 304 stainless steel. The pliers reduce the diameter of the cork to approx. 16 mm, and a special piston places the cork in the bottle. The corker is equipped with a cork container with mechanical stirrers inside to ensure their proper orientation. Maximum height of bottles supported up to 390 mm. The time required to cork the bottle is 1.8 seconds. Power supply 220V or 380V – 50 Hz (to be specified when ordering). Dimensions: 500×520 x height 1830 mm, weight 110 kg.

The price of the device also includes:

- Nitrogen injection.
- Aisi 304 stainless steel trolley on wheels.
